

Dear Delegates of the 7th HHHSMUN UNESCO Committee,

MUN according to me is not only a two-day conference that passes, yet MUN is way more than that. It's about the research, the skills, the passion, the respect, the long-lasting friendships, the sociability and open-mindedness. I first embarked on my journey at the beginning of 8th grade, extremely bewildered with the idea of MUN in general. However, my desires enabled me to continue my journey. I participated in conferences on a national and international level representing countries that oppose my beliefs but here was the biggest challenge, it is when you try to convince and adjust into a stance you are against. This program has widened my eyes concerning worldwide topics and let me think out of the circle; it also gave me a glimpse about what life is about and how it works. "You never lose, you either win or learn." This is what I believe in strongly and after years of experience I pretty assure it. This transition from a mere hobby to an impassioned occupation broke my personal barriers and pushed me forward towards a realm of enlightenment and global awareness. These few days can shape you as it did shape me. I, Maya Loutfi will be your president in the committee UNESCO. Work hard, cooperate and I promise to make it an unforgettable experience.

Warm regards from your very excited president,

Maya Loutfi
